

# Water-soluble Calcium Phosphate (WCP)

Cho Global Natural Farming (CGNF)

# Water-soluble Calcium Phosphate (WCP)

- **WCP is extracted from the bone of vertebrate animals.**
- **WCP is an essential substance for plant growth.**

# How to make WCP

## 1. Tools

- ✚ clay jar, cedar bucket
- ✚ porous paper  
(‘Korean paper or paper towel)
- ✚ rubber band

# How to make WCP

## 2. Materials

- **Bones of vertebrates (pig, cow)**
  
- **Fish bones**
  
- **Fermented BRV**

# How to make WCP

**Cow, pig, fish bone contains much calcium phosphate. After burning them at a low temperature for removing organic substances, then Put them into BRV for extracting inorganic substance, calcium phosphate.**

# THANK YOU
