

FERMENTED PLANT JUICE

DRAKE @ NATURAL FARMING HAWAII . NET

WHY USE FPJ

- ▶ Adds food to the system
- ▶ Complete ‘fertilizer’ -- hormones, enzymes, nutrients, microbes
- ▶ Easy to make
- ▶ Immediate results
- ▶ Can be customized to suit your plants

OPTIMAL RECIPE

- i) Gather many growing tips of desired plant before the morning dew evaporates
- ii) Lomi with $\frac{1}{2}$ ~ $\frac{2}{3}$ by weight brown sugar
- iii) Pack vessel $\frac{2}{3}$ full with material
- iv) Ferment 3~7 days
- v) Pour off liquid and add 1:1 brown sugar

HOW TO USE FPJ

- ▶ Dilute 1:500
 - ▶ 1 oz into 4 gallons
 - ▶ 2tsp into 5 liters
- ▶ Spray a fine mist in the evening
- ▶ Add to irrigation lines
- ▶ Most beneficial during vegetative growth and flowering periods

PLANTS TO FERMENT

- ▶ Comfrey
- ▶ Honohono
- ▶ Mugwort
- ▶ Dropwort
- ▶ Banana flowers
