

FISH AMINO ACID (FAA)

Cho Global Natural Farming (CGNF)

1. Characteristics of Fish Amino Acid

- FAA is a liquid made from fish waste.
- FAA is of great value to both plants and microorganisms in their growth.

2. How to make FAA

- ① Mix blue-back fish and brown sugar (1 : 1)

- ② Put the mixture in the container

2. How to make FAA

③ Add IMO#4 in order to decompose the fish oil and the meat

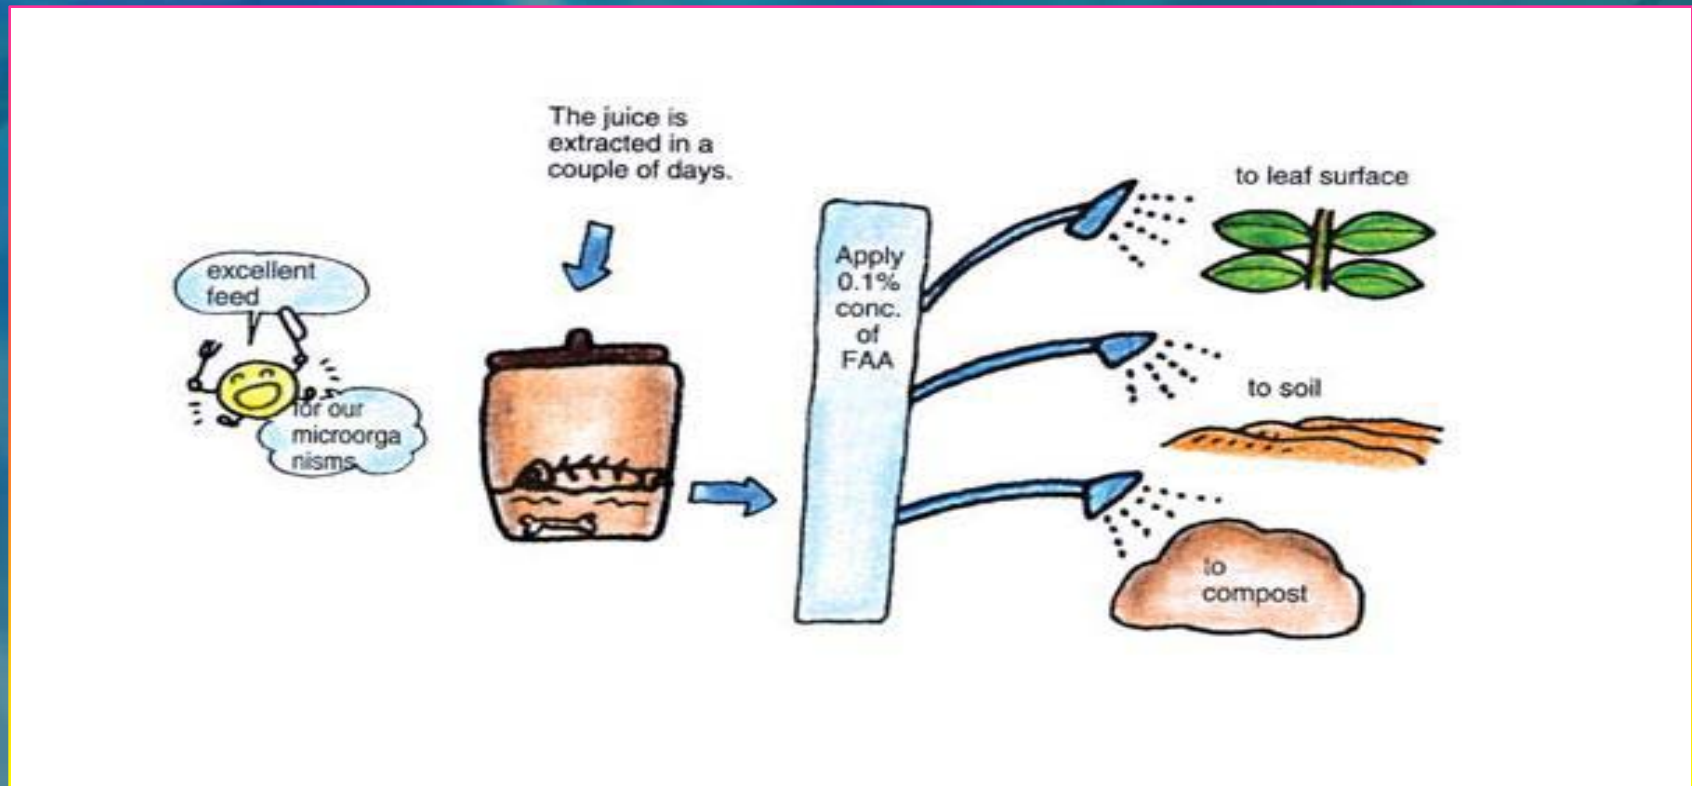

④ Add a little of amount of OHN and mineral A to revitalize IMO#4

⑤ Cover the top of jar with brown sugar, IMO#4, OHN, mineral A, rice straw.

3. How to use FAA

THANK YOU
