

Maltose

Cho Global Natural Farming(CGNF)

1. How to Make Malt

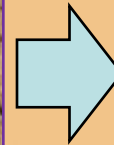

① Soak barley in water for 24 hours.

② Spray water sometimes to prevent the barley from drying out, then the sprout may come out.

1. How to Make Malt

③ when barley sprouts and grows about 0.2in long, dry them in the sunlight.

④ Pound dried barley

2. How to Make Maltose

① Malt

② Pour water, then rub and soak the malt.

2. How to Make Maltose

③ Sieve the malt.

④ Pour water again, then do the step 2 in the same way.

2. How to Make Maltose

⑤ Malt will precipitate, then use the surface water.

⑥ Keep the surface water warm in 50 °C for 5~6 hours.

THANK YOU
