Water-soluble Calcium (WCA)

Cho Global Natural Farming (CGNF)
1. Characteristics of Calcium

- Contributes to better utilization of carbohydrates and protein.
- Prevents crops from overgrowing.
- Makes fruits firm and prolongs the storage period.
- Functions to carry and accumulate nutrients.
2. Symptoms of Calcium Deficiency

- Underdeveloped roots and feeble root hairs.
- Appearance of empty bean pods.
- The leaves discolor to a brownish color and then dry out.
3. How to make WCA

① Control the temperature as you can touch the frying pan.

② Break the eggshells into small pieces.
③ Eggshells and membranes are becoming separated.

④ Roast until removing white membranes.
3. How to make WCA

⑤ Put the roasted eggshells into BRV, slowly.

⑥ Cover the container with paper towel.
3. How to make WCA

⑦ The roasted eggshells may move up and down continuously emitting bubbles. At this time, the bottom of container should not remain while they are moving up.

⑧ The completed WCA container has nothing at the bottom and immediately filtering it before preservation.
Thank you
